Commodore'un Ücretsiz Ekidir

BIG EKRAN EDITORU

BÜLENT ÜNEL

Geçen sayılarda yayınlanan Big Edit programıyla üretilmiş karakter setlerini daha rahat bir şekilde ekranda kullanabilmek için 64'ün standart ekran editörü yeterli değildir. Veya standart editörle 2×2'lik karakterleri azabilmek için bir dizi Rus on-off-shift kombinasiayla boğuşma zarureti vardır. Bu işi kolaylaştırmak için bu kısa editörü hemen yazmanızı tavsiye ederim.

Big ekran editöründe standart ekran editörünün taşıdığı özelliklerinden çoğu mecvut. Editörden çıkış için F1 tuşuna basmalıyız. Yazdığınız yazıları low-res baskı yapan kartuşlarla ya da programlarla kağıda da bastırabilirsiniz.

Yalnız unutulmaması gereken nokta eğer bir karaker seti yüklemeden programı çalıştırırsanız bomboş bir ekranla karşılaşırsınız. Onun için önce bir büyük karakter seti yükleyip editörünüzü yükleyip çalıştırın. Programı yazarken BDE'yi kullanmanızı tavsiye ederim.

LETTER MAKER

DR.ALİ HATAY

Programımız isminden anlaşılacağı gibi bir mektup yazma programı. Mesela bilgisayarı olan bir arkadaşınıza mektup yazıp haberleşmek istiyorsunuz, fakat kâğıt kalem kullanmaya üşeniyorsunuz, arşivinizde bu program varsa hemen mektubunuzu yazın ve arkadaşınıza gönderin.

Programı yazıp çalıştırınca karşınıza ana menü ve 4 seçenek gelecek.

1- Mektup yazma
2- Mektup okuma
3- Directory
4- Çıkış

Bu seçenekler için Joystick'i yukarı aşağı çekerek belirliyorsunuz ve ateşle seçiyorsunuz.

Mektup Yazma Seçeneğinde sizden kayıt edeceğiniz mektup ismi soruluyor. Buraya istediğiniz bir ismi girin. Bundan sonra mektubun yazılacağı ekran karşınıza geliyor. Ne yazmak istiyorsanız buraya yazın... Satır sonlarında Return'a basmayın kendisi otomatik olarak ikinci satıra geçecektir. Şayet 2.-3. satıra gitmek istiyorsanız kursörleri kullanabilirsiniz. Mektup uzunluğuda sınır yok. istediğiniz kadar yazabilirsiniz. Kayıt yapacağınız zaman Return tuşuna basın. Bu arada kullanabileceğiniz tuşlar şunlar.

F1 = Çerçeve Rengi
F3 = Ekran Rengi
F5 = Karakter Rengi

Return'a basmadan evvel disk sürücüyü kontrol edin. Disketi yerleştirin ve return'a basın. Mektubunuz daha önce yazmış olduğunuz isim altında disketinize kayıt edilecektir. Aynı isimde başka bir dosyanız varsa bu silinecektir.

Mektup okuma: Yazmış olduğunuz mektubu görmek istiyorsanız veya bir arkadaşınızdan gelen mektubu görmek istiyorsanız bu seçeneği kullanmanız gerekmektedir. Okuyacağınız mektubun ismini öğrenmeniz için directory'e bakmanız uygundur. Mektup ismini yazdıktan sonra mektubun görüntüsü ekrana gelecektir. Renkleri yine ayarlayabilirsiniz.

Directory: Bu seçenekle de disk sürücüdeki disketin directory'sini görebilirsiniz. Kayıtlı mektup dosyanız kırmızı diğer dosyalar siyah renkli olarak ekrana gelir. Sonuç olarak hangi mektup dosyasını seçeceğiniz veya directory'de ne var ne yok anlamanız için directory seçeneğini kullanmanız gerekmektedir.

Çıkış: Programdan çıkmak için kullanılan seçenektir.

Artık mektup yazmanız bittiyse sıra postaya vermeye geldi. Mektup dosyalarınızı bekliyorum. İyi günler.

GÖZ HIZ TESTİ

DR.ALİ HATAY

Bu program rakamları, telefon numaralarını, araba plakalarını aklında tutamayanlar için hazırlandı. Aslında gözünüzü test etmiyor, aklınızı daha doğrusu hafızanızı test ediyor. Bir rakamı zihninizde daha fazla tutma alıştırması yaptıran bu programı çalıştırdıktan sonra size bir rakam veriliyor, bu rakam ekranda belli bir süre kaldıktan sonra kayboluyor ve rakamın yazılmasını sizden istiyor. Aklınızda tuttuğunuz rakamı yazınca puanınız ve başarı oranınız belirtiliyor. Ekrandaki size göz kırpan göze bakarak vakit kaybetmeyin. Olay bu kadar basit değil zira rakam gittikçe büyüyor ve rakamın ekranda kalma süresi gittikçe kısalıyor. Yani test gittikçe zorlaşıyor. Test sonucu döküman halinde veriliyor ve klasmandaki yerinizi görmek istiyorsanız sıralamadaki yeriniz gösteriliyor. Böylece Testi uzun müddet kullanma ile gözün görme hızını artırabilirsiniz. Rakamları daha fazla hafızanızda tutma yeteneğini geliştirebilirsiniz.

GOL

DR.ALİ HATAY

Oyunumuz Kick off kadar iyi olmasa da oyuncumuzun oyunu Tanjuyu, kalecimizin kurtarışları Engini kıskandıracak kadar güzel. Bir dakika içerisinde 5 gol atan veya 5 kurtarış yapan oyuncu kazanır.

İki kişi ile oynanıyor. Bir kişi kaleci diğer kişi de futbolcu oluyor. 1. joystic futbolcuyu, 2. joystick kaleciyi temsil ediyor. İki Joystick'i olmayanlar üzelmesin çünkü kalesinin hareketlerini F5 ve F7 tuşlarıyla da idare edebilirsiniz.

Programı çalıştırınca önce isminizi ve takımınızın ismini girmeniz isteniyor. Takımlar FB, GS, BJK olmalı. Bu takımlara uygun forma renkleri ile maça çıkıyorsunuz. Ekranın üzerinde gol sayısı ve puanınız belirtiliyor. Oyun sonunda oyununuza layık bir mesaj sizi bekliyor. Oynayın görün.

GÜNLÜK

DR.ALİ HATAY

Hiç günlük tuttuğunuz oldu mu bilmem ama böyle bir programdan sonra tutacağınızdan eminim. Programı yazıp çalıştırınca önce programı kendinizden başkasının kullanmasını önlemek için kod soruluyor. Kodu bilemezseniz sistem kendisini resetliyor. Kod olarak ben 37 rakamını verdim. Siz kendi kodunuzla çalıştırmak istiyorsanız 136'ncı satırdaki 37 rakamını istediğiniz bir rakamla değiştirebilirsiniz. Ana menüde 3 seçenek var. F1 ile günlüğünüzü yazabilirsiniz. Önce hangi tarihli günlüğü yazacağınız soruluyor. Tarihi tam olarak girin. Örnek 12.08.1990 gibi. Bu şekilde yazmazsanız hem kabul edilmiyor hem de aynı tarihli günlüğünüze bir daha ulaşamazsanız. Yazılarınızı yanlış yazmışsanız Ins/del tuşu ile silebilirsiniz. Satır sonlarında return'a basmayın kendi otomatik olarak geçecektir. Yazım işi bittikten sonra return'a basın ve disketinize kayıt yapılsın. F3 tuşu ile yazdığınız günlüğü okuyabilirsiniz. Yine tarihi doğru bir şekilde girin. Karşınıza o tarihle ilgili notunuz gelecektir.

F5 tuşuyla da programdan çıkabilirsiniz.

```

TAHMİNİN NE?

DR.ALİ HATAY

Daha önce de bir iki defa yayınlanıp artık klasikler arasına girmiş olan bu tahmin oyununu bir de bu şekilde deneyin. Memnun kalacağınıza eminim. Özellikle ses ve görüntü efektleriyle yazmaya değer bir program. Sonunda ise sizi bir sürpriz bekliyor.

```

DUELLO

DR. ALİ HATAY

Red KİD ile Blue Jones arasında amansız bir duello oyunumuzun konusu. Kırmızı oyuncu Red KİD'i temsil ediyor ve joystic 1. kullanıyor. Mavi oyuncu Blue Jones'i temsil edip 2. joystick tarafından idare ediliyor. Duello sonucunda vurulan düşüp ölüyor. Hızlı ve akıllı oynayan kazanır. İyi duellolar.

```

KOALA-HIRES

YUSUF GÜLENER

Çizim meraklılarına bir utility daha. Bu program hem kısa hem de çok kullanışlı. Bunun sayesinde KOALA ile çizdiğiniz bir resmi ADVENCED ART STUDIO'ya çevirebiliyorsunuz. Böylece her iki programın da en iyi yönlerinden yararlanabiliyorsunuz. Programı MDE ile yazın, kaydettikten sonra gönül rahatlığı ile çalıştırın, KOALA formatında kayıtlı olan çizimin adını yazın ve son olarak da ADVANCED ART STUDIO formatına çevrildikten sonra diske hangi ad altında kaydedilmesini istiyorsanız onu yazın. Hepsi bu kadar, daha ne diyebilirim? Haydi iyi çizimler...

```

HIRES-LORES

YUSUF GÜLENER

Merhaba, yine ben. Adından da tahmin edebileceğiniz gibi bu program çizim programlarıyla yapılmış çizimleri karakter setlerine çeviri ve bunları diskinize kaydeder. Bu programı da MDE ile yazın ve kaydedin. Sadece gerekli sorulara gerekli isimleri girmeniz yeterli. Program, çiziminizi yükleyecek, gerekli çevrimleri ve ayarlamaları yapacak ve yeni karakter setindeki çiziminizi diske kaydedecektir. İlk soruya (HIRES NAME) çiziminizin ismini girin. Gerekli işlemleri ekranda da göreceksiniz. İkinci ve üçüncü sorulara da istediğiniz isimleri girin (CHARSET NAME: karakter setinin ismi, SCREEN NAME: Ekran ismi). Karakter seti, $2000'den karakter matrisi ise $1C00'dan itibaren diske kaydedilecektir. Hepinize iyi çalışmalar dilerim.

```

BORSA ANALİZİ

MURAT ERBAŞ

Bu PROGRAM CBM BASIC'le yazılmış bir analiz programıdır. Program açılış ekranıyla başlamaktadır. Şimdi programı adım adım inceliyelim.

ANA MENÜ

* KAYIT: Bu seçenekle KAYIT menüsüne girilir. VERİ GİRİŞİ bilgilerin girilmesiyle ilgilidir. Önce dosya kodu istenir. Bir şey yazmazsanız KAYIT Menüsüne geri dönersiniz. Kodu girdikten sonra eğer diskette bu dosya varsa üzerine, yoksa yeni bir dosya açılarak kayda başlanır. İlk bilgi TARİH'tir. Daha sonra o günkü işlem adedi istenir. Sonra sırayla o günkü en düşük, en yüksek ve kapanış fiyatları girilir. Şimdi karşınıza üç seçenek çıkmıştır: (HATA-DEVAM-ÇIKIŞ). HATA: veri girilirken verilerin girilmesinin devamını sağlar. ÇIKIŞ: O dosyadan çıkmaya yarar. KAYIT menüsünün son seçeneği ANA MENÜ'ye dönüştür.

* LİSTE: Bu seçenekle LİSTE menüsüne girilir. HAFTALIK seçeneği ve dosya kodunun verilmesiyle liste alınır. Burada her tarihe bir sayaç numarası verilir. Bu sayı çok önemlidir. Listenin sonunda tekrar görmek isteyip istemediğiniz sorulur. EVET derseniz listenin başına dönülür. HAYIR derseniz LİSTE Menüsüne dönülür. Bu menüden son seçeneği ANA MENÜYE dönüştür.

* GRAFİK: Bu seçenekle GRAFİK menüsüne girilir. HAFTALIK seçeneği ve dosya kodunun girilmesiyle GRAFİK menüsünün bir alt menüsüne girilir. Burada üç seçenek vardır. ÇİZGİ GRAFİK; kapanış fiyatlarını gözönüne alarak ve bu arada gerekli hesapları yaparak çizim işlemini yapar. ÇUBUK GRAFİK; en düşük, en yüksek ve kapanış fiyatlarıyla işlem adedini gözönüne alarak çubuk grafik çizer. Grafik bölümde grafiğin başlayacağı tarih sayaç numarasıyla bilgisayara belirtilir. Son seçenek her zamanki gibi ANA MENÜ'ye dönüşür.

KOMUT DEĞİŞTİRME

SİNAN VURAL

Daha önce de dergimizde Türkçe komut yapıcı programlar yayınlanmıştır. Bu program da bir anlamda o işi yapıyor, fakat komutları programda açıkladığımız şekilde siz ayarlıyorsunuz. Program sadece BASIC ROM'u kendi altındaki boş RAM'a kopyalıyor ve o alanı işletime geçiriyor. Bundan sonrası sizin ellerinize kalmış.

```
PROGRAM ADI : KOMUT DEG.
